

EXPERIMENT 2

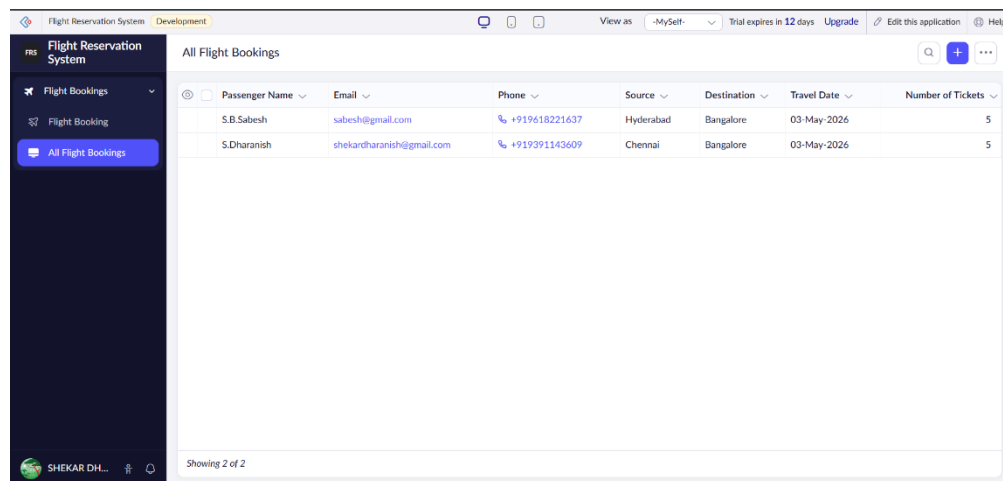

Flight Reservation System

Aim: To create a cloud-based Flight Reservation System using Zoho Creator and demonstrate Software as a Service (SaaS).

Procedure:

1. Login to Zoho Creator and create a new application.
2. Create a Flight Booking Form.
3. Add fields: Passenger Name, Email, Source, Destination, Date, Tickets, Class, Price.
4. Configure field properties and validations.
5. Create workflow to calculate ticket price.
6. Save the form and test with sample data.

Output:

The screenshot displays the Zoho Creator interface for a 'Flight Reservation System' application. The left sidebar shows the application structure with 'Flight Bookings' selected. The main area shows a table titled 'All Flight Bookings' with the following data:

Passenger Name	Email	Phone	Source	Destination	Travel Date	Number of Tickets
S.B.Sabesh	sabesh@gmail.com	+919618221637	Hyderabad	Bangalore	03-May-2026	5
S.Dharanish	shekardharanish@gmail.com	+919391143609	Chennai	Bangalore	03-May-2026	5

The interface also includes a top navigation bar with options like 'View as', 'Trial expires in 12 days', and 'Upgrade'. The bottom status bar indicates 'Showing 2 of 2' records.

Result: A cloud-based Flight Reservation System was successfully created using zoho.
