

EXP NO 17. Create a Simple Web Application using Java or Python and host it in any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Platform as a Service (PaaS).

AIM:

To Create a Simple Web Application using Java or Python and host it in any Public Cloud Service Provider (Azure/GCP/AWS) to demonstrate Platform as a Service (PaaS).

Procedure:

Procedure:

1. Create Flask App:

- Create a folder FlaskApp.
- Create app.py with:

```
from flask import Flask  
app = Flask(__name__)  
@app.route('/')  
def home():  
    return "Hello! Flask App on Azure PaaS"  
if __name__ == '__main__':  
    app.run()
```
- Create requirements.txt:

```
flask  
gunicorn
```

2. Log in to Azure Portal:

- Go to <https://portal.azure.com>
- Sign in.

3. Create Web App (PaaS):

- Click **Create a Resource** → **Web App**
- Fill details:
 - Resource Group: PaaS-Flask-RG
 - Name: flask-paas-demo
 - Runtime: Python 3.x
 - Region: nearest
- Click **Create**.

4. **Deploy App:**

- Compress the folder as .zip.
- In Azure Portal → your Web App → **Deployment** → **ZIP Deploy**
- Upload the .zip file.

5. **Test the App:**

- Click **Browse** in the Web App Overview
- Open the link, you will see:
- Hello! Flask App on Azure PaaS

6. **Cleanup (Optional):**

- Delete the Resource Group to stop charges.

Create a resource group

BasicsTagsReview + create

Resource group - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. [Learn more](#)

Microsoft Azure portal showing the 'Create Web App' wizard. The wizard is at the 'Review + create' step. The summary shows a 'Web App by Microsoft' with a 'Free sku' and an estimated price of 'Free'. A warning message states: 'Basic authentication for this app is currently disabled and may impact deployments. Click to learn more.' The details section shows the subscription ID '75e1e16e-428e-4402-84c9-4163a4486ab1', resource group 'PaaS-Flask-RG', and app name 'my-pass-flask-app'. Navigation buttons include 'Create', '< Previous', 'Next >', and 'Download a template for automation'.

Microsoft Azure portal showing the 'my-pass-flask-app | Advanced Tools' page. The page title is 'my-pass-flask-app | Advanced Tools'. The left sidebar lists categories: Performance, Load Testing, Development Tools, Advanced Tools (selected), and Monitoring. The main content area shows the 'Advanced Tools' icon and text: 'Advanced Tools provides a collection of developer oriented tools and extensibility points for your App Service Apps. Learn more'. A 'Go' button is also present.
