

EXP NO 18. Demonstrate Storage as a Service (SaaS) create and configure a new VM Image in any Public Cloud Service Provider using Azure.

AIM:

To Demonstrate Storage as a Service (SaaS) create and configure a new VM Image in any Public Cloud Service Provider using Azure.

Procedure:

Step 1: Log in to Azure

- Go to <https://portal.azure.com> and sign in.

Step 2: Create a Resource Group

- Click Resource Groups → + Create
- Name: SaaS-Storage-RG
- Select nearest Region
- Click Review + Create → Create

Step 3: Create a Storage Account

- Click Create a Resource → Storage → Storage Account
- Fill details:
 - Resource Group: SaaS-Storage-RG
 - Storage Account Name: saasdemostorage123
 - Performance: Standard, Replication: LRS
- Click Review + Create → Create

Step 4: Create Container & Upload File

- Open the storage account → Containers → + Container → Name: mycontainer
- Open mycontainer → Click Upload → Select a file

Step 5: Access File Publicly

- Click the uploaded file → Generate SAS / URL
- Copy the link → Open in browser or share

Create a resource group

Basics Tags Review + create

Resource group - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. [Learn more](#)

Subscription * Azure for Students

Resource group name * SaaS-storage-RG

Region * (Asia Pacific) East Asia

Microsoft Azure portal interface showing the "Create a resource group" page. The page is divided into "Basics" and "Tags" sections. The "Basics" section shows the subscription "Azure for Students", resource group name "SaaS-storage-RG", and region "East Asia". The "Tags" section shows "None". The "Review + create" tab is selected. A "Notifications" panel on the right shows three notifications: "Save code settings" (32 minutes ago), "Deployment succeeded" (an hour ago), and "Resource group created" (an hour ago). The "Create" button is visible at the bottom.

Microsoft Azure portal interface showing the "Create a resource" page. The page displays a list of services and marketplaces, including Virtual network, Key Vault, Virtual machine, Storage account, Data Factory, and Logic App. The "Storage account" service is highlighted. The "Notifications" panel on the right shows three notifications: "Save code settings" (33 minutes ago), "Deployment succeeded" (an hour ago), and "Resource group created" (an hour ago). The "Create" button is visible at the bottom.
