

EXP NO 19. Create a Storage service using any Public Cloud Service Provider (Azure/GCP/AWS) and check the public accessibility of the stored file to demonstrate Storage as a Service.

AIM:

To Demonstrate Storage as a Service (SaaS) create and configure a new VM Image in any Public Cloud Service Provider using Azure.

Procedure:

Step 1: Log in to Azure

- Go to <https://portal.azure.com> and sign in.

Step 2: Create a Resource Group

- Click Resource Groups → + Create
- Name: SaaS-Storage-RG
- Select nearest Region
- Click Review + Create → Create

Step 3: Create a Storage Account

- Click Create a Resource → Storage → Storage Account
- Fill details:
 - Resource Group: SaaS-Storage-RG
 - Storage Account Name: saasdemostorage123
 - Performance: Standard, Replication: LRS
- Click Review + Create → Create

Step 4: Create Container & Upload File

- Open the storage account → Containers → + Container → Name: mycontainer
- Open mycontainer → Click Upload → Select a file

Step 5: Access File Publicly

- Click the uploaded file → Generate SAS / URL
- Copy the link → Open in browser or share

Design:

The image displays two screenshots of the Microsoft Azure portal interface, illustrating the design of resource group management and creation.

Top Screenshot: Resource groups overview

The top screenshot shows the "Resource groups" page in the Azure portal. The page header includes the Microsoft Azure logo, a search bar, and the user's profile. The main content area displays a table of resource groups, with columns for Name, Subscription, and Location. A "Create" button is visible in the top left corner. A notification panel on the right side shows recent events, including "Save code settings", "Deployment succeeded", and "Resource group created".

Name	Subscription	Location
DefaultResourceGroup-CID	Azure for Students	Central India
DefaultResourceGroup-EA	Azure for Students	East Asia
DefaultResourceGroup-null	Azure for Students	Canada East
IaaS-Demo-RG	Azure for Students	East Asia
MyWebRG	Azure for Students	Central India
NetworkWatcherRG	Azure for Students	East Asia

Bottom Screenshot: Create a resource group

The bottom screenshot shows the "Create a resource group" page. The page has a "Basics" tab selected, and a "Review + create" button is visible. The form includes fields for Subscription, Resource group name, and Region. A notification panel on the right side shows recent events, including "Save code settings", "Deployment succeeded", and "Resource group created".

Subscription: Azure for Students

Resource group name: SaaS-storage-RG

Region: (Asia Pacific) East Asia

Buttons: Previous, Next, Review + create

Microsoft Azure portal interface showing the "Create a resource group" wizard. The "Review + create" tab is active, displaying the following details:

- Subscription:** Azure for Students
- Resource group name:** SaaS-storage-RG
- Region:** East Asia
- Tags:** None

Navigation buttons: Previous, Next, Create.

Notifications:
